

## Switching to Sprizzi's Beverage Dispenser will Save you Time, Money, and the Earth

As technology continues to expand, we are introduced with innovative new ways to achieve goals, maximize the quality of our time and save money. When it comes to beverages, there is a new solution that is quickly growing in popularity, and its versatility allows for use in the home, office, or even dorm. The Drink Machine by Sprizzi is a beverage dispenser you will wonder how you ever lived without.

### Versatility You Will Appreciate

While the office water cooler is able to offer a hot or cold glass of water, that's as far as its capabilities normally go. With the Drink Machine, you can enjoy your favorite beverage as it is able to work as a soda dispenser as well. In addition to ice-cold water, among the various beverages you can enjoy with its use include:

- Flavored soda
- Carbonated water
- Juice
- Iced tea
- Lemonade
- Sports drinks

### Saving Space

This new beverage dispenser also allows for you to save space in your kitchen or office. Around the size of a coffee maker, the Drink Machine offers you a number of your favorite beverages at a fraction of the space as similar products. Best of all, you can also increase the aesthetics of your surroundings by choosing a color that best matches the space it will occupy as a number of colors are available upon purchase.

### Great Value

When you make the investment in this innovative device, Sprizzi makes it well worth your money. Not only do you receive the soda dispenser itself, but they throw in extra items to help you better enjoy their already exciting product. When you order, you will also receive:

- Two full CO2 cannisters capable of producing 12 gallons of carbonated beverages and free refills
- Inexpensive flavor bullets of your favorite beverages

### Evolution at a Glimpse

Today is an exciting time in history, and humans have been able to continually come up with ways to make everyday life moments more convenient. The Drink Machine started as a converted mini-fridge which took up much more room. The next model, a floor standing version, proved too bulky to provide

efficiency. Trial and error can be frustrating, but the result is a practical machine that customers are finding convenient and well worth the expense.

### **Saving You Money**

We are all looking for ways to save money, and the Drink Machine does just that. Rather than spending two dollars on your favorite flavored soda on your way to work, this product can offer you the same amount for as little as 35 cents. Order today and save hundreds over time.
